

Introducing the BHL MiniRaQ™

BlackHawk Labs' new MiniRaQ™ literally stands alone as the ultimate solution for installing wall-mount or rack-mount equipment in an IDF or data center closet environment. This is because the MiniRaQ allows IT equipment to be conveniently situated in areas previously considered impossible for placement.

For businesses where space is highly valued, the MiniRaQ's unique features enable a wide assortment of patch panels, network switches, uninterruptible power supplies, and other important components to be accommodated in tight quarters. The MiniRaQ can be installed quickly and easily, and without complication. The unit permits most wide components to be fitted vertically, while its superior cable management methodology enhances the quality of the overall presentation.

The MiniRaQ was further designed to readily adapt to each customer's evolving equipment requirements. Its user-upgradeable side panels and integrated leveling capability are indicative of the strong focus placed on modularity. The MiniRaQ complies with all relevant EIA standards to ensure a safe and proper installation.

Convenience

Space Saver

The MiniRaQ can be sized to fit in areas previously considered difficult or impossible for equipment placement.

Optimized for Deep Components

Deep components can be installed vertically, instead of horizontally, to allow placement in relatively tight quarters.

Incorporated Cable Management

Provides clean and secure installation.

Adaptability

Wallmount

The MiniRaQ easily mounts on the studs of a wall or onto a backboard.

Rackmount

Expand your two-post rack space! Mount two MiniRaQs back-to-back on any 19" standard two-post rack and increase the usable rack space.

Expandable - Interchangeable mounting brackets allow for easy expansion from 4U to 8U of vertical rack space.

Designated Patch Panel Space - Integrated 1U or 2U Patch Panel Bay provides excellent cable management and preserves rack space.

Accessorize

Side panels are designed to accept 1U rackmount PDU or cable management accessories.

Ease of Install

Simple Installation - One person can safely perform the installation without assistance and without complications.

Built-in Level - Designed to easily ensure proper installation.

Fits EIA standards - MiniRaQ will integrate any 19" standard device.

Mounting Options - MiniRaQ offers three simple and effective mounting options.

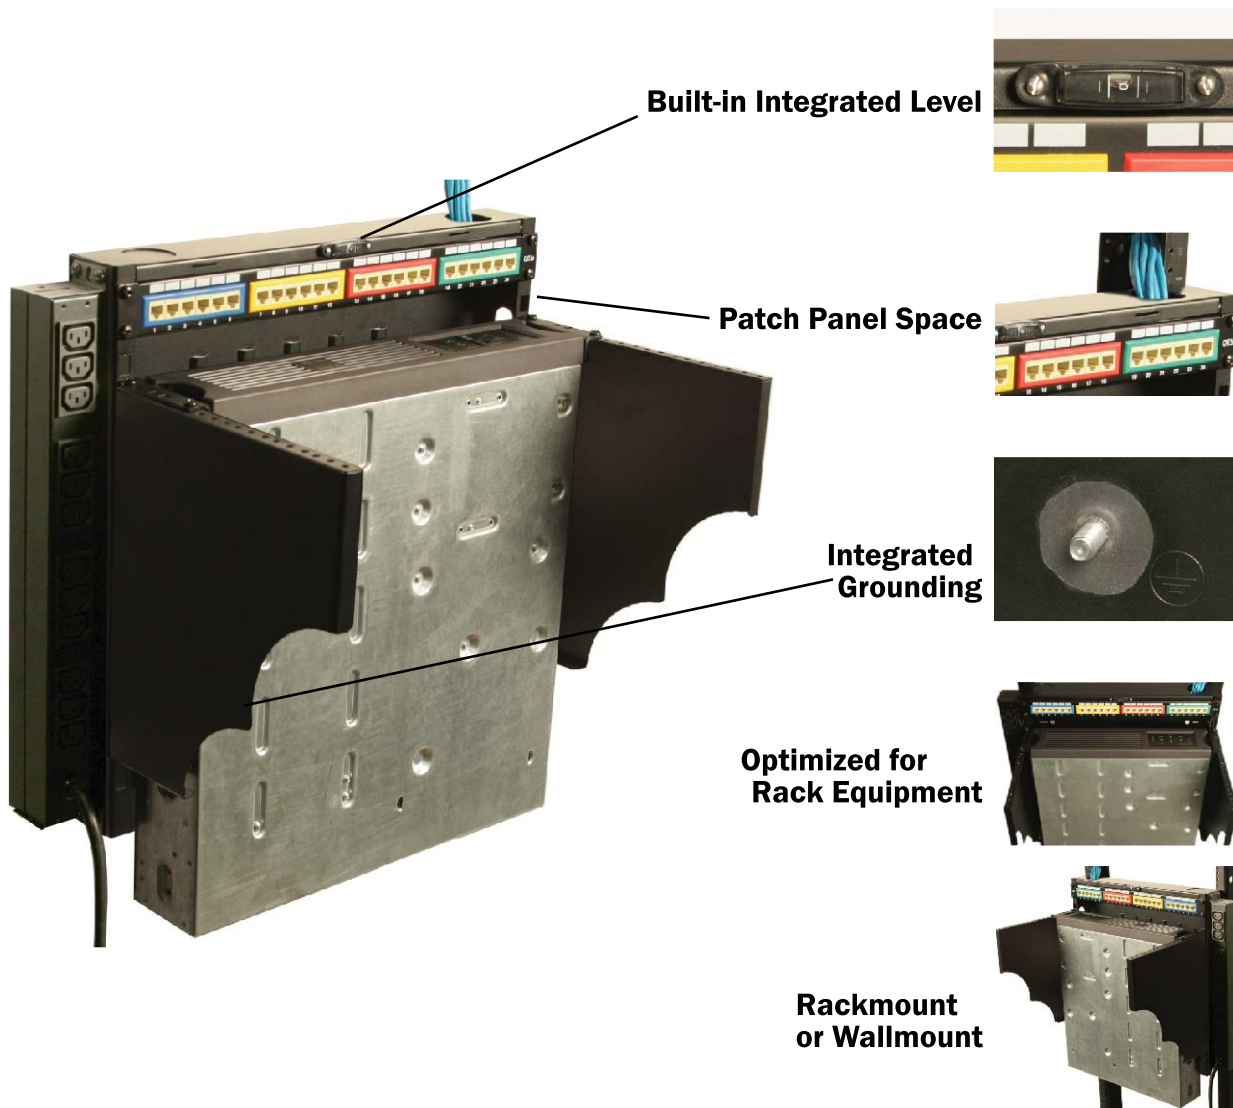

Safety

Up to 400 Pound Capacity - This Large Weight capacity can be held with no additional bracing.

Integrated Grounding - Front-accessible ground bolt.

MiniRaQ™

Our mission is to design, manufacture and support high quality products with features that fit our customers' specific requirements.
